

# The Digital Enterprise @ Discrete and Process Industries

José Borges Frias Jr.

Digitalization  
changes everything

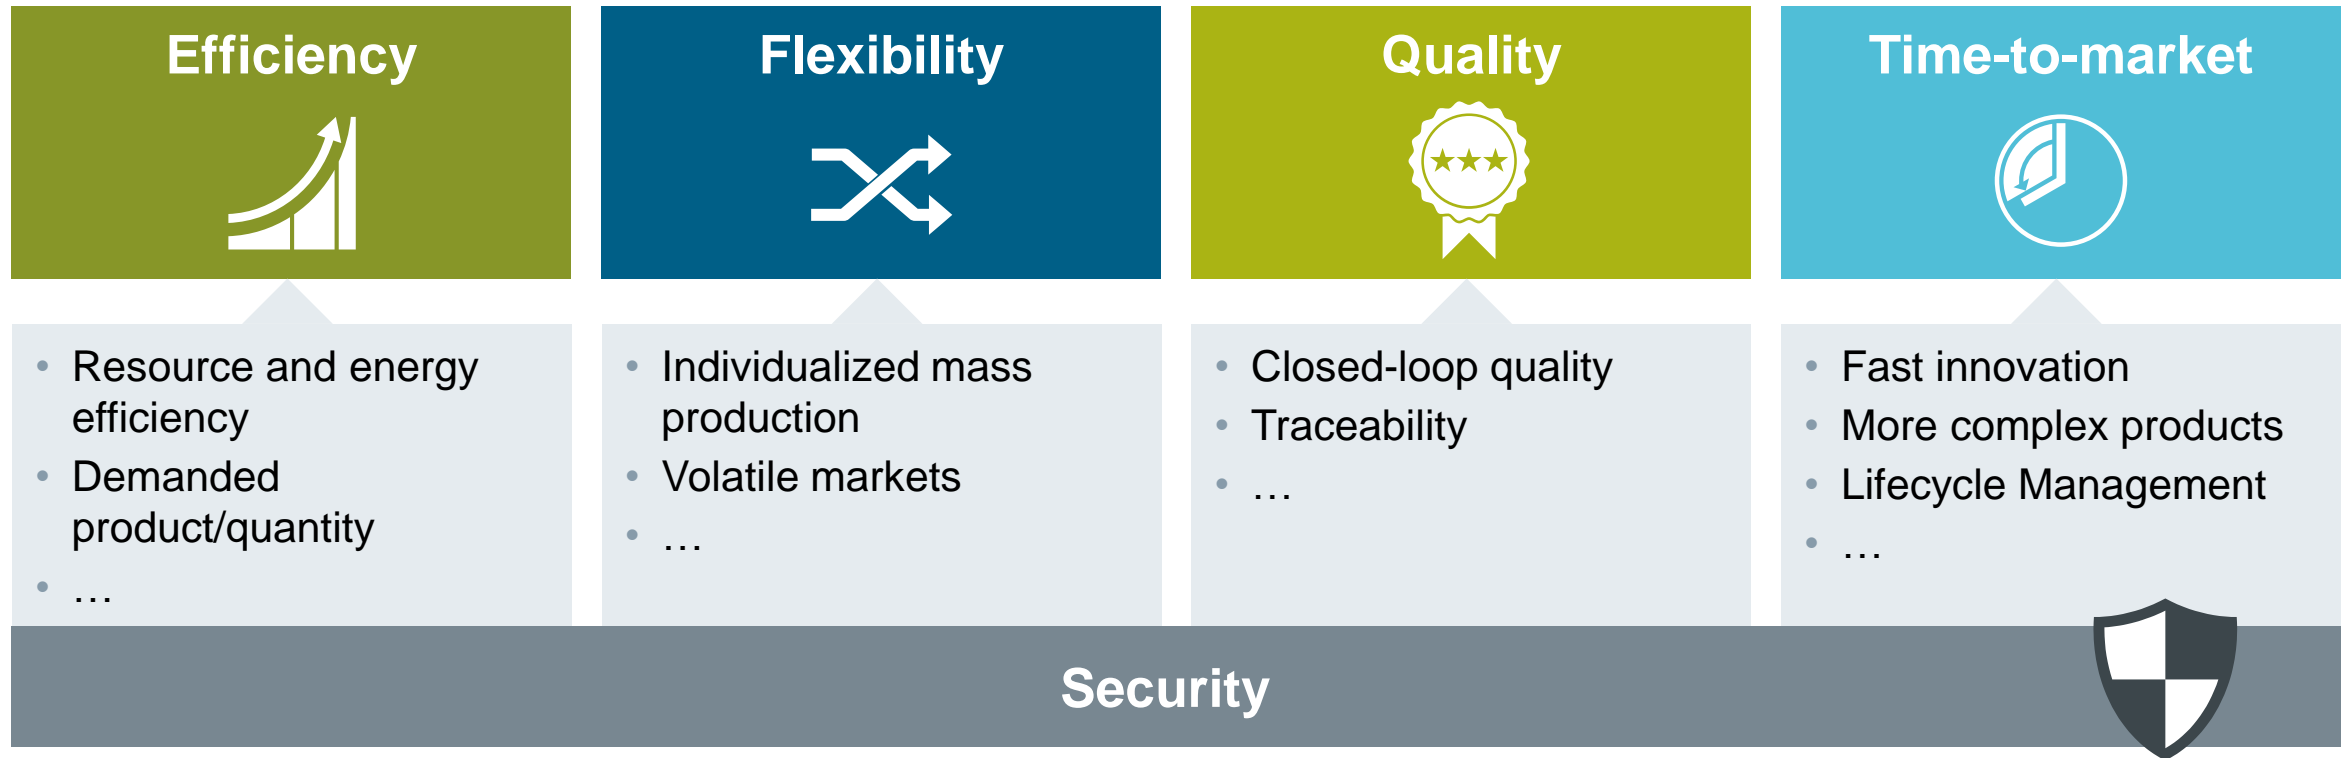

This increases pressure  
on industrial enterprises.

# Generating customer benefits is our key priority

## Industry demands

**HSSE** – Health & Safety | Environment | Regulations/Standard | ...

Simply focusing on the automation aspect  
of manufacturing is not enough.

# Digitalization is the next level of productivity

## Electrification, Automation and Digitalization as levers to increase productivity

### Global trends

Digitalization

Globalization

Urbanization

Demographic change

Climate change

*Different initiatives, e.g.*

- *Industrie 4.0*
- *Industrial Internet Consortium (IIC)*
- *Made in China 2025*
- ...

Digitalization

Automation

Electrification

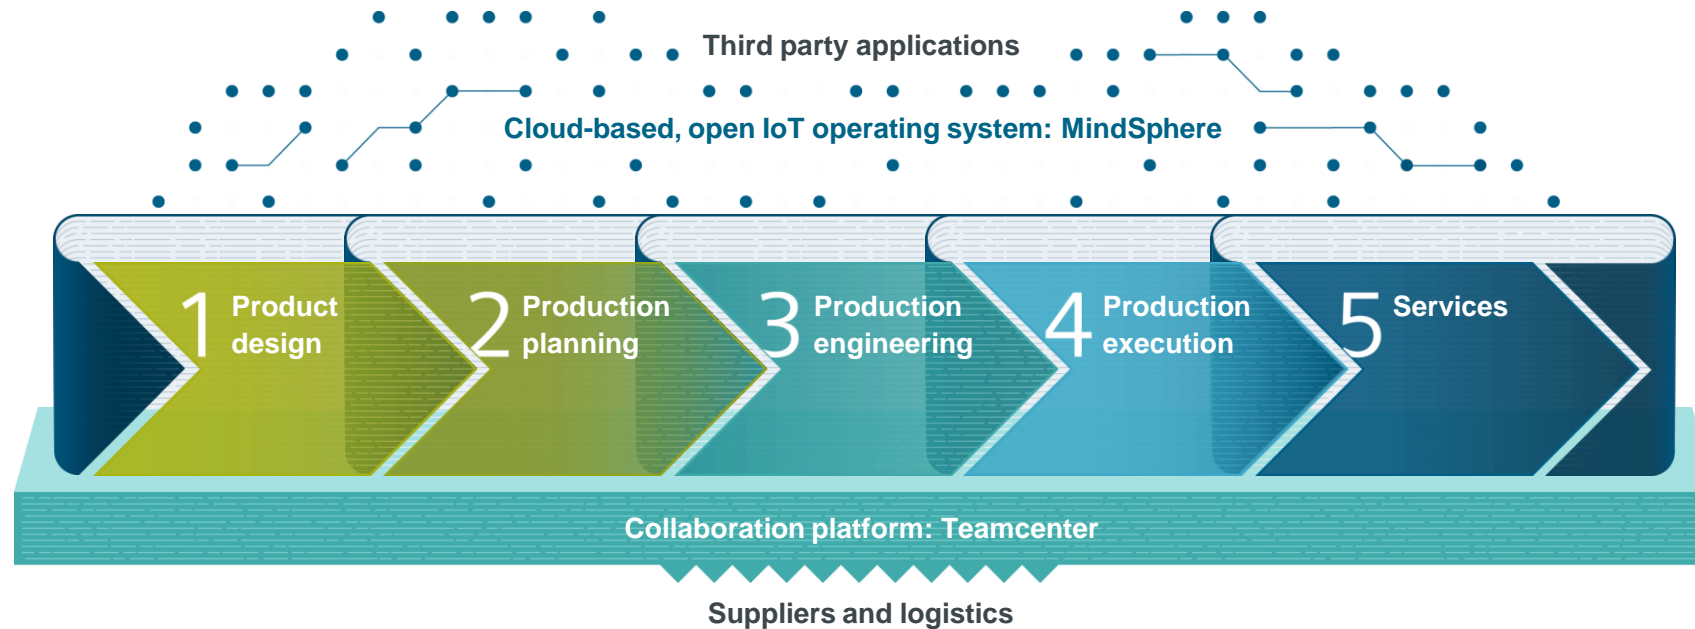

Next level of productivity

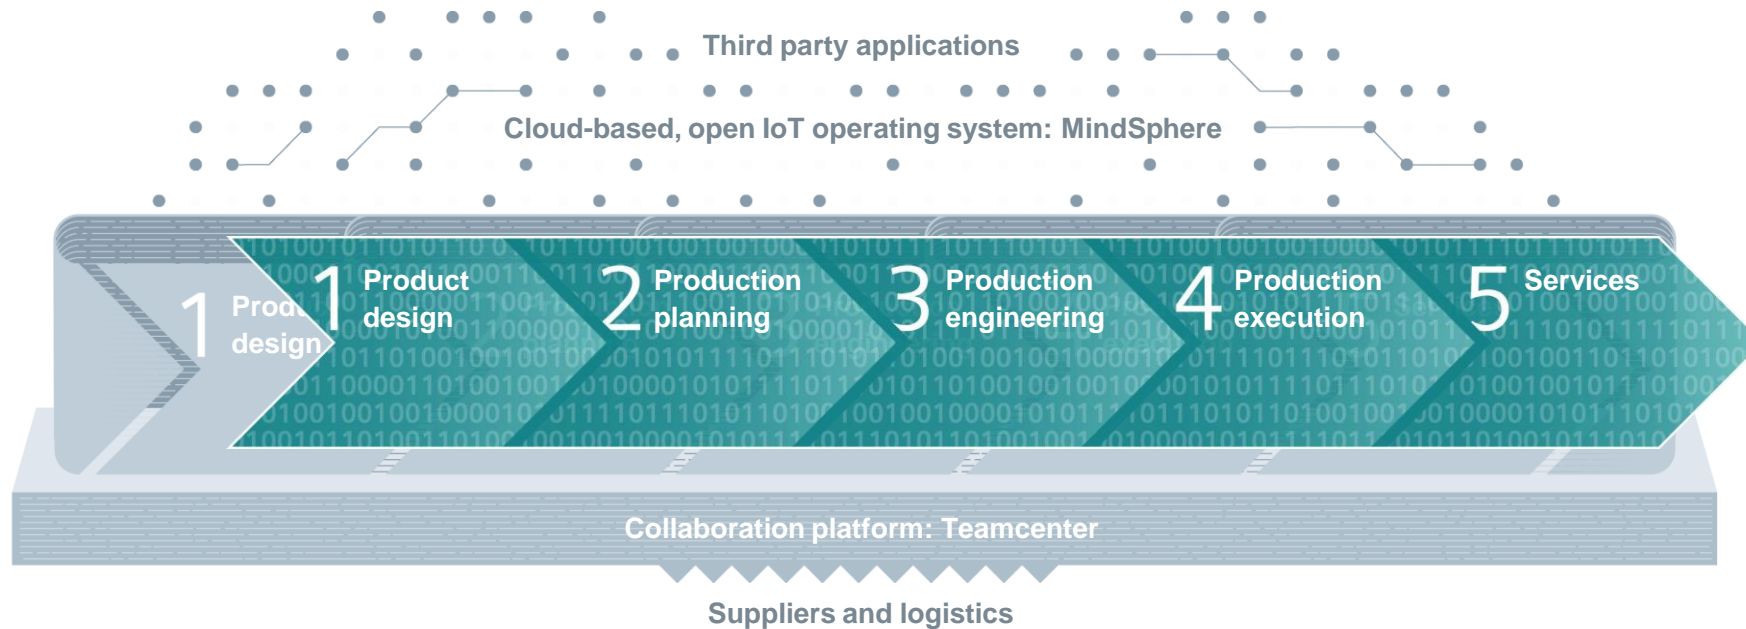

Time

# Integrating and digitalizing the entire value chain is key to staying competitive in the future

# Integrating and digitalizing the entire value chain is key to staying competitive in the future

Cyber Security

### DIGITALIZATION

Digital Enterprise @  
Discrete

Digital Enterprise @  
Process

Get ready: Digitali-  
zation Masterplan

# Integração de domínios técnicos em um único modelo de dados

## Gêmeo digital do produto

## Gêmeo digital do processo produtivo

## Gêmeo digital do equipamento

# Publishing the optimized Digital Twin to all stakeholders, including suppliers, with the collaboration platform Teamcenter

# Our holistic approach

## Specific for end customers and machine builders

# Digital Enterprise is our portfolio of solutions for the digital transformation – in both discrete industry and process industry

## Digital Enterprise

### Process Industries

### Discrete Industries

#### Industrial Software and Automation for process industries

#### Industrial Communication

#### Industrial Security

#### Industrial Services

# Digitalization demands a holistic approach

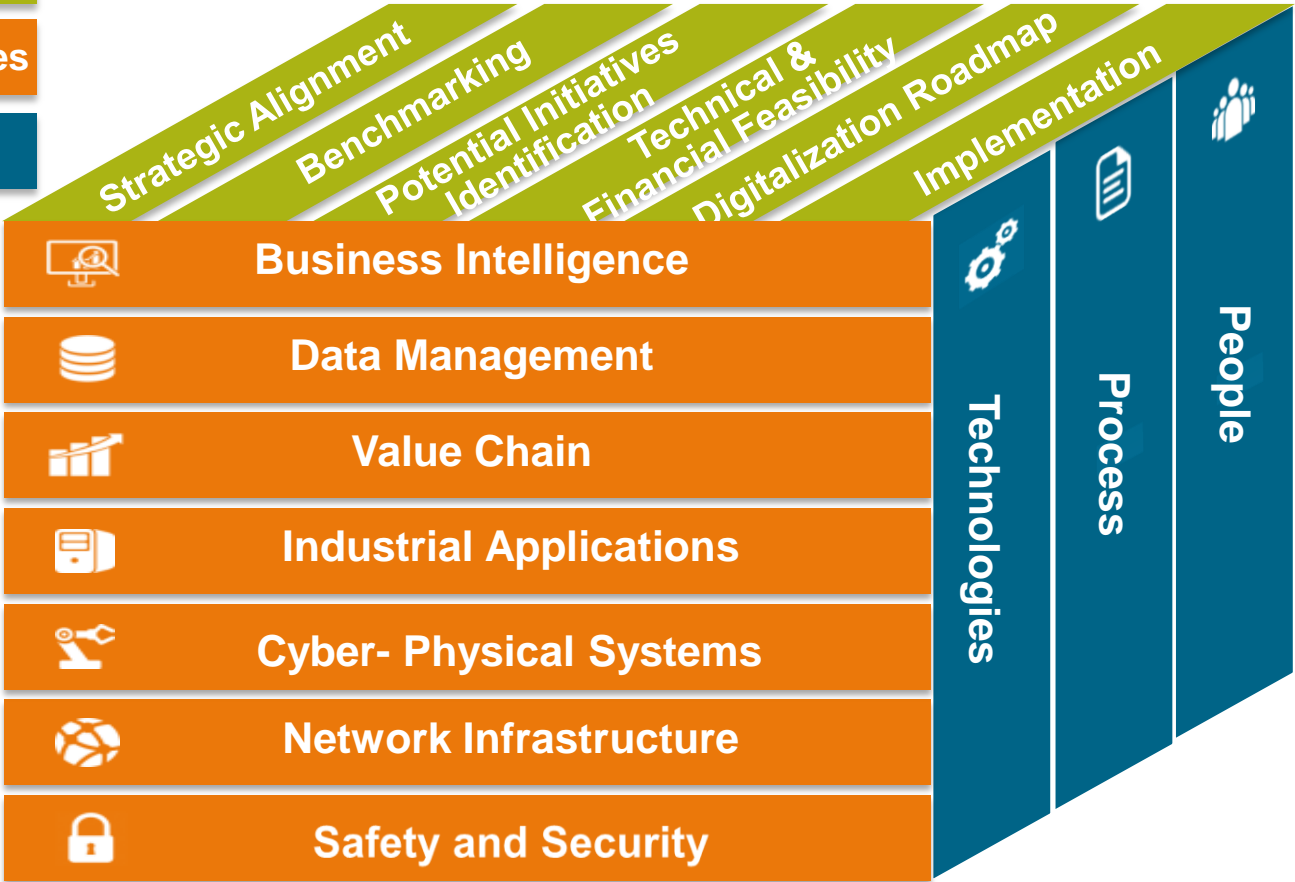

# Digitalization demands a holistic approach

## Perspectives to be addressed

- Consulting approach
- Technological perspectives
- Organizational aspects

Digitalization  
changes everything

... and Industrial IoT  
also part of this change

## Cloud-based, open IoT operating system MindSphere

- MindSphere has data analytics and connectivity capabilities, tools for developers, applications and services.
- It enables cities, institutions and industrial enterprises to improve the efficiency of systems through the acquisition and analysis of large quantities of process data.
- MindSphere transform data into knowledge, and knowledge into sustainable business management.
