Transformando dados em novas possibilidades

The image displays a central Power BI Desktop interface with several key components:

- Overview:** A dashboard showing sales figures for Australia (\$5.3M), Canada (\$5.3M), France (\$2.6M), Germany (\$2.3M), UK (\$3.3M), and USA (\$21.8M).
- Key influencers:** A section titled "What influences NSAT to be 7" with interactive filters for UnitPrice and Manufacturer.
- Units by Product and Sale Size:** A trellis plot of violin charts showing the distribution of units for Large, Medium, and Small sizes.
- Sales Amount by Brand Name:** A trellis plot of bar charts showing sales for brands like Contoso, Adventure Works, and Proseware.

Surrounding the desktop view are several mobile app screenshots:

- Top Left:** A "Sales Dashboard" showing a total of \$21.8M and a breakdown by country.
- Top Right:** Two screenshots of the "Annotate" feature, showing a line chart with a callout bubble saying "Great!".
- Bottom Left:** A "Sales Report" with a time-series line chart and a donut chart.
- Bottom Center:** A "Favorites" list containing reports like "BIOD Defects Status", "Canary Report", and "Power BI Cluster Details".
- Bottom Right:** A "Sales Dashboard" with multiple charts, including a trellis plot of violin charts and a trellis plot of bar charts.

Tools to help with GDPR

Ramp up on GDPR

Starting May 25th 2018, organizations with operations inside the European Union must follow General Data Protection Regulations (GDPR) to safeguard personal data. Office 365 is committed to assisting you in building a secure framework for satisfying your GDPR responsibilities.

Data subject requests

Quick actions

Article 15 of GDPR provides the ability for a Data Subject (user) to obtain their data from the organization that they were associated. Security and Compliance Center provides your organization the ability to create a new Data Subject Rights (DSR) request case. A DSR is something which you create when someone (say an ex-employee) wants all content relating to them.

The image shows a Windows desktop with two applications open. On the left is the Windows Settings app, and on the right is Microsoft Excel.

Windows Settings - Color filters

Color filters
Make photos and colors easier to see by applying a color filter to your screen.

Use color filters

Turn on color filters
 Off

Allow the shortcut key to toggle filter on or off
Press the Windows logo key **⊞** + **Ctrl** + **C** to toggle filter on or off.

Select a color filter to see elements on the screen better

- Inverted (reverse colors on the display)
- Grayscale
- Grayscale inverted

Or select a colorblindness filter to make the nine colors on the wheel more distinct.

- Red-green (green weak, deuteranopia)
- Red-green (red weak, protanopia)
- Blue-yellow (tritanopia)

A color wheel diagram is visible at the bottom of the settings page.
